Setting up Microsoft Authenticator App (MFA) on the Mobile device

Introduction

Provide an overview of the task or process the guide will cover, emphasizing the goal and why it's important.

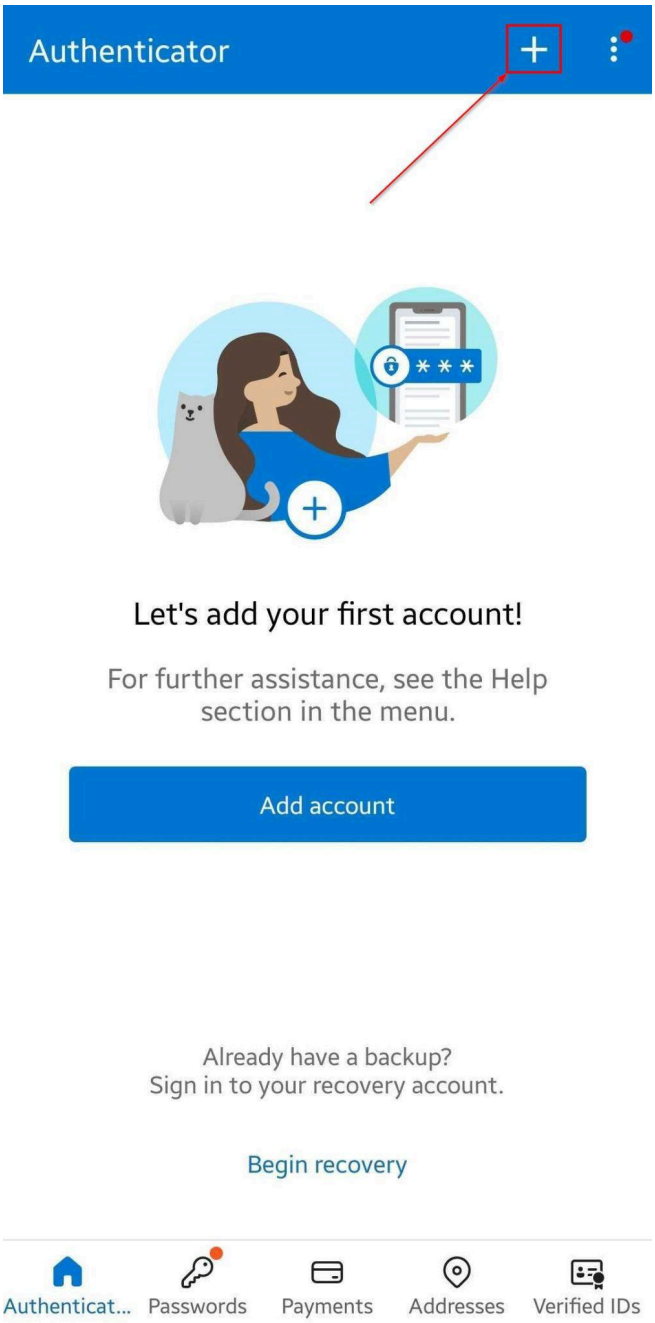
Preparation Steps

1. If you have an iPhone: open the App Store and install Microsoft Authenticator
   If you have an Android phone: open the Play Store and install Microsoft Authenticator
2. Head to https://aka.ms/mfasetup
3. Log in using your Visma account.

Step-by-Step Instructions

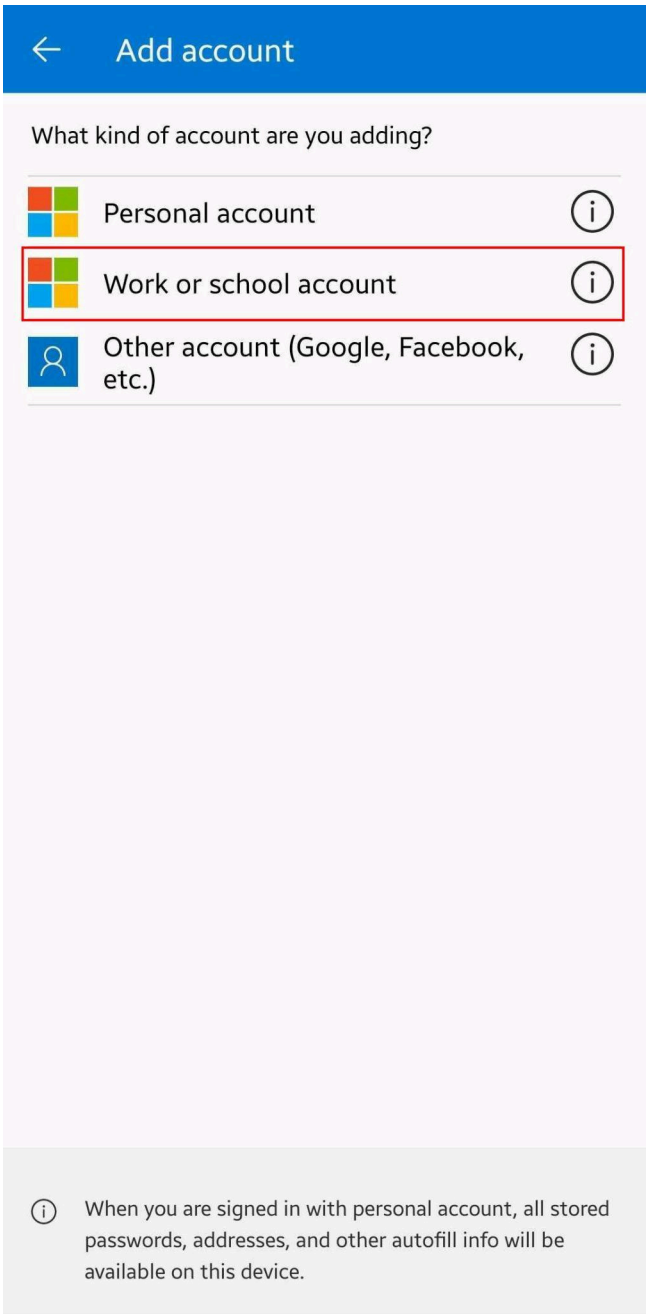
1. Open the newly installed Microsoft Authenticator App (you **DO NOT** need to log to your account in the application you just installed on your phone)

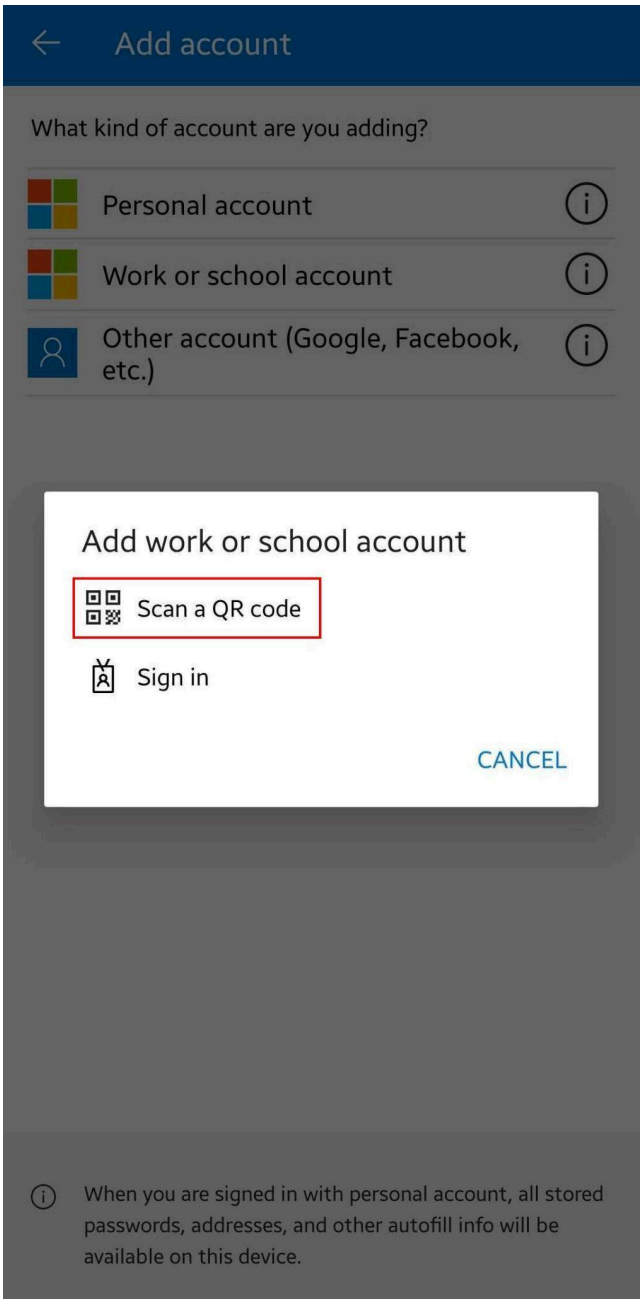
2. Tap on the + icon in the top right corner



3. On the next screen select **Work or School account**

Please make sure you tap on the text and not on the (i)





4. Then select **Scan QR** code and scan the QR code provided in the setup process.
